Edit Taste Influencers

After selecting your beer from the Search results, the beer's basic details will populate in the next screen. These fields are not editable.

1. Make a mental note of the beer's ABV now. If 8% or above, you will need it for profiling Booziness.
2. The fields *Mood, Venue, Event,* and *Hype* will reset from the previous profile. Tap on the drop down of each and select the value that best describes the taste influencers.
3. Tap .
