Create Your Taste Profile
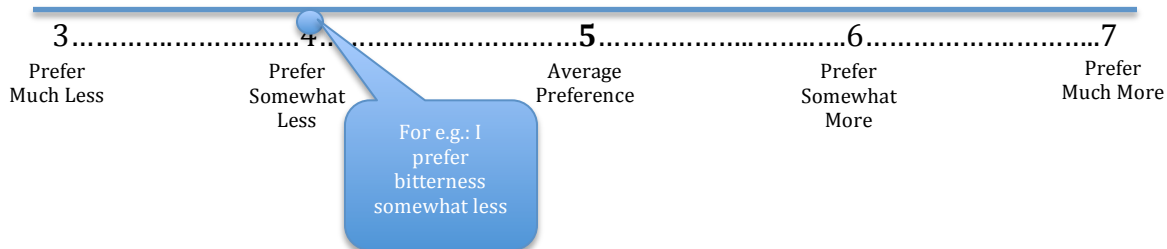

IMPORTANT

*Keep in mind, as you set your taste profile you are setting the button according to **how much you prefer that taste parameter**.*

3...........................4.........................…..5..............................…....6..............…..………...7

| Prefer Much Less | Prefer Somewhat Less | Average Preference | Prefer Somewhat More | Prefer Much More |

For e.g.: I prefer bitterness somewhat less

1. Set the slider button for each taste parameter.
2. Make sure you also set the optional parameters when prompted.

   a. Sour is for Sour Ales
   b. Additive is for a beer that contains any additive ingredient beyond malt, yeast, and hops. For e.g., fruit, spices, barrel / wood aging, etc....
   c. Booziness is for beers that have an 8% ABV or above as a general rule.

3. Your taste profile is not complete unless you have set all 9 parameters, 6 basic and 3 optional.

Your Taste Profile becomes the baseline against which a beer's taste profile will be measured.

Editing Your Taste Profile

As your palate evolves, you can change your taste profile to reflect any palate changes.

1. From the **Search for / Add a Beer** screen, tap on in the top right corner.

2. Tap in the lower right corner.

3. Tap in the top right corner.

4. Slide each to position it accordingly to your new preference.

5. a. **Base parameters only**- Tap on and **Save** .

   b. **Optional parameters also**- Tap on **Proceed** before saving.

   c. Tap when you have finished your editing.
